

## Calling Innovative and Inspirational Geography Teachers

# DISCOVERING OMAN

Win a free Geography  
Fieldwork week in Oman

With soaring sand dunes, spectacular mountains that reach up to 10,000 feet into the sky, frankincense covered uplands, a coastline that stretches for more than 1,800 miles, modern cities, warm hospitality and a rich culture and heritage that goes back some 5,000 years - Oman is a geographical paradise.

In the 1980s, in Oman's Sharqiya desert, the Royal Geographical Society undertook the most intensive study of any arid environment. In late 2017, exactly thirty years after that research ended, Oman will open its first purpose-built centre for outdoor learning in the Sharqiya desert.

For full details of how to enter, please visit

Closing date for entries is May 6th 2017

### DISCOVERING OMAN

The Discovering Oman project aims to create a series of innovative, curriculum linked, on-line resources for use by teachers in the UK and Oman.

In December 2017 there will be a fully funded, week-long fieldwork visit to Oman for four innovative geography teachers, each accompanied by an outstanding

young geographer from their school to gather data to create engaging lesson plans.

1. England and Wales: one teacher of Upper Key Stage 2
2. England and Wales: one teacher of KS3
3. Scotland: one teacher of P6/7
4. Scotland: one teacher of S1/S2
